Boiler plate & Brief - eMudhra

eMudhra is a pioneer in PKI driven Digital Transformation in India. As the largest licensed Certifying Authority in India (under the Controller of Certifying Authorities), eMudhra has paved the way for digital transactions in context of the required legal non-repudiation, security, and trust required to propel society forward. eMudhra has a strong solution stack that focuses on Identity and Digital Trust and consequent workflow applications to enable a digital society and empower organizations to adapt to the Digital era. eMudhra currently operates in over 50 countries with a mission to securely digitize society through empowering trust in presence-less transactions.

eMudhra is focused on SECURE Digital Transformation, enabling organizations to progress and evolve without sacrificing "Trust," which matters most in our society. eMudhra has an end-to-end stack around trust services and related applications ranging from trust certificates to core Public Key Infrastructure (PKI) and encryption applications. Some of the areas of focus are around paperless transformation, identity management, AI-driven digital initiatives and building digital trust ecosystems at all levels.

eMudhra chairs the Asia PKI Consortium, is a board member of the Cloud Signature Consortium and a member of the CA Browser Forum. Having been in business for over 12 years and having built a reach that spans more than 50 countries, eMudhra is deeply committed to bringing change and helping societies not just to go digital but to go digital in secure way.

eMudhra is a global public trust service provider and has managed over 50 million identities through its Certifying Authority operations. eMudhra's enterprise solutions are helping over 600 large organizations including national defense organizations, government regulators, large banks, global eCommerce players, and more.

Biju Varghese
